SEGWANG KIM

SW Engineer at Immersive SW Group, Mobile eXperience Division, Samsung Electronics
E-mail: ksk5693@snu.ac.kr, Github, SegwangKim, Google Scholar

My goal is to develop innovative products at the intersection of mathematics and computer science, bridging theory and practical solutions to make a meaningful impact on society.

EDUCATION

Doctor of Philosophy Mar 2016 - Fall 2022
Department of Electrical and Computer Engineering, Seoul National Univ. Seoul, Korea
Advisor: *Kyomin Jung*

Bachelor of Science (Cum Laude) Mar 2012 - Feb 2016
College of Liberal Studies, Seoul National Univ. Seoul, Korea
Major: Mathematics, Minor: Statistics

WORK EXPERIENCE

SW Engineer for Extended Reality Sep 2022 -
Immersive SW group, Mobile eXperience Division, Samsung Electronics Suwon, Korea

- Calibration, July 2024 -
  - Develop accuracy evaluation frameworks for online calibration (ocal) solution correcting sensor alignments over prolonged usage.
  - Perform sensitivity analyses, develop fiducial-based world-lock verification, and verify binocular misalignment.
  - Leverage comprehensive mathematical expertise and practical implementation skills, including computer vision techniques and rendering pipelines.
- SLAM, Sep 2022 - June 2024
  - Designed and executed evaluation pipelines for Simultaneous Localization and Mapping (SLAM) solutions on AR devices.
  - Enhanced reliability of Samsung's proprietary robotics libraries by creating extensive documentation and implementing rigorous unit testing procedures.

INTERNSHIPS

Undergraduate Research Internship Summer 2014
Numerical Computing and Image Analysis Lab, Seoul National Univ. Seoul, Korea
Driven Cavity Problem with 5th WENO Method - I implemented a C++ numerical solution of Navier-Stokes equations to describe fluid dynamics in a 2D rectangle with obstacles.
Advisor: *Myeongju Kang*

HONORS AND AWARDS

AI Specialist Sep 2022
Mobile eXperience division, Samsung Electronics Suwon, Korea

SNU AIIS Spring Retreat Best Poster Award (3rd place) April 2021
Artificial Intelligence Institute Seoul (AIIS) National University Seoul, Korea

PUBLICATIONS

Conference Proceedings

PROJECTS

Improving Reliability of Large-scale Language Models 2021 - 2023
NAVER
In collaboration with NAVER's language research team, I worked on enhancing the reliability of open-domain QA systems for handling ambiguous user queries. Our efforts resulted in the publication of a top-tier Natural Language Processing conference paper.

Developing Deep Learning Architecture for Logical Inference 2019 - 2021
Samsung Research Funding & Incubation Center for Future Technology
I spearheaded a research project aimed at designing novel architectures and learning methods to imbue deep learning models with logical inference abilities. Our work led to the publication of papers, including one in a top-tier AI conference paper.

Developing Automatic Temperature System 2018 - 2019
Dasan DNG
I led the development of a smart thermostat system, bridging the gap between customer requirements and developer plans.

Rumor Detection on NAVER Blog Spaces 2017 - 2018
NAVER
I proposed a machine learning approach for detecting malicious rumors on social media. Our method, based on XGBoost-based tree boosting, provides insights into which word combinations in a post contribute to its classification as a rumor.

Improving Japanese-Korean Neural Machine Translation Models 2016 - 2017
NAVER
To address out-of-vocabulary issues in machine translation, I implemented a method from a published paper. This approach covers N^2 words with $2N$ subwords using graph optimization techniques.

PROGRAMMING SKILLS

- C++: OpenCV, Robotics Library
- Python: PyTorch, TensorFlow
- Bash
- MATLAB

EXTRACURRICULAR ACTIVITIES

Sports

Soccer — Spring 2012 -

- 1st place, SNU President's Cup Soccer Tournament — Spring 2015
- 1st place, SNU President's Cup Soccer Tournament — Spring 2013

Swimming — Summer 2016 -

Tennis — Summer 2017 -

Last Updated: March 27, 2025
